About Me

A creative Product Designer with a background in **Industrial Design**. I design **user centered** digital products and enjoy breaking down **complex problems** into clear, **practical solutions** through research and teamwork.

Experience

Mohaymen

product Designer

June 2025 - Present

- Redesigned the cloud **service creation flow** to simplify user journeys, **reduce unnecessary steps**, and accelerate product setup.
- Designed and implemented a **design system** inspired Shadcn UI , authoring comprehensive **documentation** to standardize UI components.
- Designed a self service deployment and **installation wizard** that enables clients to **install cloud services** on their own, **without needing on-site DevOps** assistance.
- Designed the end to end UX/UI of cloud services **marketplace**, simplifying service discovery and **reducing** the effort required to launch **customizable SaaS** solutions.
- As part of my role in product design, I implemented and **launched** the product using a **low code platform**.

Makeen Ideal Media

UX/UI Designer

Feb 2024 - june 2025

- Designed **responsive** and visually consistent interfaces aligned with business goals.
- Collaborated in an **Agile environment**, participating in daily stand ups and **sprint planning**.
- Defined **project scope**, analyzed **user needs**, and developed user personas to inform design decisions.

Key Projects

- Dorna A **travel platform** that simplifies the process of discovering, comparing, and booking tours.
- Kheradkhan A digital **reading platform** where users can save, organize the notes.
- Namanegar A **filmmaking app** supporting screenwriting, production planning, and filming workflows.
